I heard that our right for privacy at home is going to be weaken, by letting telemarketers to disturb us in our rest time; I hope you guys at FCC. don't let this happen. I think we have the right to stop unwanted calls before they even occur. Besides if we need them WE WILL CALL THEM!! not the other way around. There is no reason to let them use our phones to make our lives misserable again.

Thanks for letting us express how we feel about this issue.
